EDUCATION

manipal university jaipur
b-tech
(2022 - Present)

› **Major:** computer science

EXPERIENCE

Altus mindstream | TECHINCAL INTERN   (june 25 - July 2025 | Jaipur, Rajasthan)

› During my internship at Altus Mindstream, I worked as a Web Development Intern, where I was deeply involved in the end-to-end development of client-facing applications. My primary responsibilities included building scalable and type-safe UI components with Next.js and TypeScript. I leveraged Tailwind CSS for rapid, utility-first styling and brought interfaces to life with sophisticated animations using Framer Motion. This role provided me with invaluable hands-on experience in a professional team environment, from initial feature design to final deployment.

PROJECTS

MyUI ↗ | ◯   (jan 25 - apr 25)

`next js` `node.js` `monodb` `tailwind`

› MyUI is a curated collection of reusable UI components designed to bring your applications to life. Built on a foundation of Next.js for performance, Tailwind CSS for rapid styling, and Framer Motion for fluid, production-ready animations, this library provides the building blocks for modern, interactive user interfaces. Stop fighting with dependencies and start building with code you own.

personal portfolio website ↗   (Sep 2024 - Sep 2024)

`next js` `motion` `tailwind` `MyUI`

› A sleek personal resume website showcasing professional experience, skills, and projects, built with modern web technologies. It offers a clean, responsive design and easy navigation, serving as a digital portfolio for potential employers and collaborators to explore your work.

Combined Dev Heatmap ↗   (aug 2025 - sep 25)

`next.js` `motion` `tailwind` `MyUI`

› Developed a full-stack data visualization tool that generates a unified contribution heatmap from a developer's GitHub and LeetCode profiles. Engineered a robust serverless backend using Next.js API routes to act as a proxy, securely consuming data from third-party APIs and resolving browser CORS issues. Designed and built a responsive and interactive frontend with React and Tailwind CSS to render the combined data.

SKILLS

LANGUAGES

Python | HTML | Javascript | c/c++

FRAMEWORKS

React.js | Next.js | Node.js | Vite.js | Tailwind CSS | Bootstrap | Neon | express.js | motion | 3js

prisma

TOOLS

Git | GitHub | recoil | postman | react-router | axios | cors | nodemon | uuid | axios

jsonwebtoken | axios | gsap | motion | shadcn
